

- a1  
cont -
- ii) diagnosing, or prognosing said disease, wherein a varied level, or activity, or both said level and said activity, of at least one substance which is selected from the group consisting of (a) to (h) compared to a reference value representing a known health status; or a level, or activity, or both said level and said activity, of at least one substance which is selected from the group consisting of (a) to (h) similar or equal to a reference value representing a known disease status indicates diagnosis, or prognosis of said disease.

---

REMARKS

09:37:54.101501

New claims 39-76 are presented for consideration. Claims 39-76 correspond to original claims 1-38, revised to eliminate multiple dependencies and to, otherwise, more clearly define the instant invention.

Favorable action is requested.

Respectfully submitted,

By:
